

Product Supply Update on Adequan®

As you may know, Adequan® (polysulfated glycosaminoglycan) is manufactured by Luitpold Pharmaceuticals, Inc.

An upgrade to manufacturing equipment at the API manufacturer has led to a more pronounced yellowing of Adequan. Adequan is known to yellow over time, and this is normal for the product. We have tested the product and can confirm that the product meets FDA specifications which were established as part of the FDA approval process following the completion of safety and efficacy studies. Therefore we believe that safety and efficacy are not affected by the yellowing and the product can continue to be used. We will continue to test this product at regular intervals.

We understand the inconvenience this may cause to you and your clients and Luitpold is working diligently to reestablish supply to the market. We will continue to share updates regarding our progress.

Our Medical Affairs staff, including a licensed veterinarian, is available to answer any technical questions you may have regarding Adequan®. You can reach them by phone, Monday through Friday from 9 a.m. to 5 p.m. EDT by calling 1-800-458-0163.

We will continue to update you as we have more information to share about supplies of Adequan. The well-being of your patients continues to be our top priority.
